

Technical Writing Workshop

OVERVIEW

What is the workshop about?

Designing User Manuals calls for Technical Writing skills, which is different from skills required for other forms of communication, such as learning content or marketing material. This course addresses the fine nuances of Technical Writing.

AUDIENCE

Who should attend the workshop?

This course is meant for novice resources that are recruited by organizations to create User Manuals and Help Guides for various organizational products and processes. Freshers looking for a career in technical writing will also benefit from this course.

CURRICULUM

How is the workshop structured?

1. Technical Writing Vs Other Writing
2. Technical Writing: Types
3. Technical Piece: Anatomy
4. Common Oversights

METHODOLOGY

How is the workshop designed?

The course is designed as a mix of concepts and principles that provide key insights, and exercises that require the participants to complete real-world work-place tasks.
